DAILY ONLINE ACTIVITIES SUMMARY

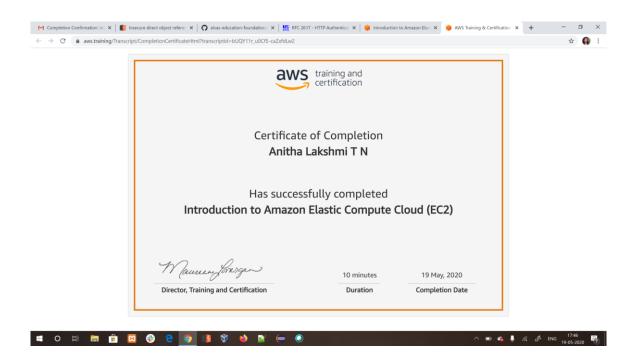

Date:	19/05/2020		Name:		Anitha	Anitha Lakshmi TN			
Sem & Sec	Sem & Sec 8 th - A			USN:	4AL16	CS012			
Online Test Summary									
Subject	Big data analytics								
Max. Marks 30			S	Score 24					
Certification Course Summary									
Course Introduction to EC2									
Certificate Provider		AWS	Γ	Duration		10 minutes			
Coding Challenges									
Problem Statement: 1) We have a Letter or a word then we need add some letters to it and need to find out shortest palindrome For example we take "S": S will be the shortest palindrome string. If we take "xyz": zyxyz will be the shortest palindrome string So we need to add some characters to the given string or character and find out what will be the shortest palindrome string by using simple java program. 2) Write a simple code to identify given linked list is palindrome or not by using stack. First take a Stack. Traverse through each node of the linked list and push each node value to Stack. Once the traversal & copying is done, iterate through linked list from head node again. In each iteration, pop one stack element and compare with node value in respective iteration. It is expected to match stack popped value with node value. In case of all matches, its a palindrome. Any one element mismatch makes it not a palindrome. Status: Executed both									
Status: Exec	cutea both	1							

Uploaded the report in Github	Yes
If yes Repository name	Anitha_lakshmi
